# Healthy Water – Happy Planet

Switching from single-use plastic water bottles to home water filtration is one of the easiest, most impactful steps to living healthy and protecting the environment.

## Bottled Water Facts:

- Each day, people in the U.S. throw away more than 60 million plastic water bottles.
- Plastic water bottles take 450 years to decompose.
- 80% of the plastic water bottles people buy end up in landfills.
- It takes three times the volume of water to manufacture one bottle of water than it does to fill it.
- There are around 244,000 metric tons of plastic floating in our oceans.
- Drinking the recommended 8 glasses of water per day costs about \$0.49 per year from tap, but \$1,400 with bottled water.
